## Thrift Industry Restructuring And The Net Worth Certificate Program

The Garn-St Germain Depository Institutions Act of 1982 authorized capital assistance programs for savings and loan associations and savings banks. These programs were intended to increase the net worth of weakened institutions so that they could return to profitability.

The act requires GAO to examine the net worth certificate program and to report to the Congress. GAO used data on thrift institutions for the period December 1977 through September 1984. This report shows the restructuring that occurred and the progress made toward profitability by the industry; by early participants in the Federal Savings and Loan Insurance Corporation net worth certificate program; and by a set of institutions that were potentially eligible to participate, but chose not to do so.

GENERAL GOVERNMENT  
DIVISION

B-219962

The Honorable Jake Garn  
Chairman, Committee on Banking, Housing  
and Urban Affairs  
United States Senate

The Honorable Fernand J. St Germain  
Chairman, Committee on Banking, Finance  
and Urban Affairs  
House of Representatives

In response to our legislative requirement to audit the Net Worth Certificate Program provided for by the Garn-St Germain Depository Institutions Act of 1982, we prepared information on conditions in the thrift industry (institutions insured by the Federal Savings and Loan Insurance Corporation (FSLIC)). We also examined the condition of the thrift participants in the Net Worth Certificate program. The time period our data cover is from December 1977 through September 1984, encompassing both the Depository Institutions Deregulation and Monetary Control Act of 1980 and the Garn-St Germain Act of 1982.

The information contained in this report was provided in the form of a briefing document to House and Senate Committee staffs in May. Our data were the most current available at that time. Copies of our work were provided to the Federal Home Loan Bank Board, the FSLIC, the Federal Reserve Board, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency. We are publishing this information because of its comprehensiveness and because of interest expressed in its content by many participants in the financial services industry.

OBJECTIVES, SCOPE, AND METHODOLOGY

The long-felt concern about the condition of the thrift industry has been strongly reinforced in recent statements by both the current and the past Chairmen of the Federal Home Loan Bank Board on the potential for widespread failures and the resulting danger to the FSLIC insurance fund. Our first objective, therefore, is to depict the condition and history of the FSLIC-insured savings and loans (S&Ls) and savings banks from December 1977 through September 1984. Summary measures are presented in table 1.1 (p. 4) both for the industry and for a group of participants in the Net Worth Certificate (NWC) program. This program was created by the Garn-St Germain Act to provide regulatory net worth to thrifts whose net worth was low and falling due to losses.

The emergency powers section of the Garn-St Germain Act will expire in October of this year. Congress will therefore be considering whether to renew these powers (including the NWC program) or to cancel, replace, or supplement them. Many of these emergency powers were granted to industry regulators to better allow them to handle the incipient crises among depository institutions, particularly thrifts, that existed in 1981 and 1982. One of the longer term objectives of the Garn-St Germain Act, as was also true of the earlier Depository Institutions Deregulation and Monetary Control Act of 1980, was to grant thrifts extended powers to change the asset and liability composition of their balance sheets. These powers were to enable thrifts to diversify in order to reduce their exposure to the housing industry's cyclical fluctuations and to the interest rate risk inherent in funding fixed-rate long-maturity assets with short-term or variably priced liabilities. Therefore, our second objective is to examine the extent of restructuring that had taken place in the thrift industry through September 1984.

Given our congressional reporting requirement on the Net Worth Certificate program, our third objective is to assess the performance of the participants in the NWC program administered by the Federal Home Loan Bank Board (FHLBB) over the period of our analysis.

An examination of changes occurring in the thrift industry and an assessment of the NWC program require historical data that are comparable over time. Given the legislative and economic events that have directly affected the thrift industry, we felt that data extending at least back to 1977 were necessary. The best sources of data on individual FSLIC-insured thrift institutions are the Financial Statements that they are required to file with the FHLBB. These reports were submitted semiannually through 1983 and quarterly since March 1984.

When moving to the quarterly reporting schedule, however, the FHLBB so completely revised its report contents and format that little historically consistent data can be obtained from published sources. As the Bank Board was unable to supply us with data in a usable form, we had the information found on the FHLBB's earlier (pre-1984) reports converted to the format used on the more recent quarterly reports. The result was a consistent set of data on the thrift industry for the period December 1977 to September 1984.

We have used these data to calculate totals, average values, and growth rates for a large number of variables that describe the condition of the thrift industry during the period studied. We then compared the performance of the NWC

participants with that of a control group and with the industry. At the same time, we were able to examine the industry to see how it recovered and changed after the serious crisis it suffered from 1980 through 1982.

Tables 1.1 (pp. 4-5) and 1.2 (pp. 6-7) provide summaries of performance for the industry and for the participants in the NWC program. Greater detail is provided in the appendixes on the comparative behavior of the industry, program participants, and a set of institutions that were eligible to participate in the program but chose not to do so. These three groups are defined as follows:

1. NWC participants, a group of 67 institutions that issued Net Worth Certificates before the end of 1983.
2. Eligible nonparticipants, a group of 577 thrifts that were potentially eligible for net worth certificate assistance according to the FHLBB because they had met the two primary requirements for program eligibility as of December 1982 and June 1983. That is, they had regulatory net worth between 0.5 percent and 3.0 percent of assets and had incurred losses during the two previous quarters. These institutions chose not to participate in the program, however.
3. All FSLIC-insured institutions, both savings and loans and savings banks.

We have no conclusions or recommendations in our report. However, several observations can be made from the data.

#### THE INDUSTRY-WIDE PICTURE

The overall condition of the thrift industry had not, by September 1984, improved markedly since the crisis of 1981-82. On average, thrifts had returned to profitability (table 52, p. 117), but profits continued to be low by historical standards (0.05 percent return on assets in the third quarter of 1984). The number of institutions decreased from 4,055 in December 1977 to 3,287 at the end of 1982 and to 3,137 in September 1984 (table 1, p. 26).

Average net worth for the industry was also low by the FHLBB's standards. By September 1984, industry net worth was on average less than 3 percent of assets (measured under generally accepted accounting principles (GAAP)). At that same time, 417 insured institutions were insolvent (GAAP net worth less than zero) compared with 216 institutions in December 1982. Another 896 institutions had low net worth (GAAP net worth between 0.0 and 3.0 percent of assets) in September 1984.

Table 1.1

## Summary of Industry Performance

	All FSLIC-insured institutions		Net worth certificate participants <sup>a</sup>	
	December 1982	September 1984	December 1982	September 1984
<b>I. CAPITAL ADEQUACY, ASSETS, AND GROWTH</b>				
A. Number and net worth of FSLIC-insured institutions				
Total number of institutions (%)	3,287 (100.0%)	3,137 (100.0%)	67	66 (100.0%)
Total assets	\$686,225,762,000	\$922,351,872,000	\$13,190,350,000	\$15,586,542,000
Number of insolvent institutions (%) (GAAP net worth < 0% of assets)	216 (6.6%)	417 (13.3%)	20 (29.9%)	56 (84.8%)
Total assets of insolvent institutions	\$54,320,034,000	\$96,221,594,000	\$5,641,124,000	\$13,247,764,000
Number of low net worth institutions (%) (GAAP net worth between 0% and 3% of assets)	921 (28.0%)	896 (28.6%)	47 (70.1%)	10 (15.2%)
Total assets of low net worth institutions	\$222,834,287,000	\$383,145,377,000	\$7,549,226,000	\$2,338,778,000
B. Industry net worth as a percent of assets (tables 27, 28)				
Regulatory net worth <sup>b</sup>	3.69	3.86	1.63	1.3
GAAP net worth	3.18	2.94	-1.25	-2.80
Tangible net worth	0.76	0.47	-2.39	-4.08
C. Average growth of assets (at annual rates) (table 3)				
	5.99 <sup>c</sup>	19.09 <sup>d</sup>	7.37 <sup>c</sup>	10.01 <sup>d</sup>
<b>II. EARNINGS</b>				
A. Profitability (tables 52, 53)				
Net income as a % of assets	-0.27	0.05	-1.56	-0.52
Net operating income as a % of assets	-1.15	0.04	-2.11	-0.44
Net nonoperating income as a % of assets	0.08	0.06	0.43	-0.07
Operating income ratio (operating income/operating expenses)	0.90	1.00	0.82	0.96
Nonoperating income ratio (nonoperating income/nonoperating expenses)	3.91	1.21	3.76	0.65

	All FSLIC-insured institutions		Net worth certificate participants <sup>a</sup>	
	December 1982	September 1984	December 1982	September 1984
B. Rate of return on net worth				
Regulatory net worth (table 55)	-7.40	1.21	-95.60	-38.10
GAAP net worth (table 56)	-8.76	1.58	N/A <sup>d</sup>	N/A <sup>e</sup>
III. INCOME AND EXPENSES				
A. Average interest rate received on assets <sup>f</sup>				
(tables 38, 39)				
Mortgages	10.29	10.45	9.63	10.23%
Mortgage-backed securities	8.75	10.64	10.99	10.16
Consumer loans	12.70	12.75	12.73	12.57
Commercial loans	10.81	12.24	12.98	14.86
Liquid assets	10.22	10.60	9.86	10.01
B. Average interest rate paid on liabilities <sup>f</sup>				
(tables 48, 49)				
Deposits	10.65	9.99	10.42	9.61
FHLB advances	13.71	11.20	13.53	11.42
Subordinated debentures	7.37	8.87	N/A	N/A
Mortgage-backed bonds	8.72	12.47	14.25	N/A
C. Market interest rates <sup>g</sup>				
Federal funds (daily averages)	8.95	11.30	8.95	11.30
3-month Treasury bill	7.94	10.37	7.94	10.37
U.S. Government bonds (20-year maturity)	10.62	12.42	10.62	12.42

<sup>a</sup>The 67 net worth participants used here and throughout the following tables are the institutions that received net worth certificates during 1982 and 1983. Thus, the information given here on asset size and net worth condition refer only to the institutions in our sample, not to the entire set of NWC participants as of September 1984. (See Glossary, p. 20, for more information.)

<sup>b</sup>These net worth concepts, together with many of the other entries on this table, are defined in the glossary, p. 18.

<sup>c</sup>Pre-Garn-St Germain, June 1980 to December 1982.

<sup>d</sup>Post-Garn-St Germain, December 1982 to September 1984.

<sup>e</sup>The rate of return to GAAP net worth for NWC participants is not defined since both net income and GAAP net worth are negative. (See table 56.)

<sup>f</sup>Average interest rates received on assets is an approximation calculated by dividing income type by the corresponding asset type. Average interest rates paid on liabilities is calculated in a similar way using expenses and liabilities. These numbers can be affected dramatically by the timing of changes in the stocks and flows and by small numbers, particularly when looking at a subset of the industry.

<sup>g</sup>Market interest rates are taken from the Federal Reserve Bulletin, March 1983 and April 1985 (table 1.35).

Brokered deposits	1.19	4.60	+ 3.41	0.39	0.90	+ 0.51

<sup>a</sup>The sum of fixed plus adjustable rate mortgages does not equal total mortgages because of differences in the definitions used by the FHLBB. Loans-in-process, a type of contra-asset, is subtracted from total mortgages, but not from fixed and adjustable rate mortgages.

<sup>b</sup>Money Market Deposit Accounts (MMDAs) were authorized to begin in mid-December 1982.

Despite the poor net worth position of the industry, the average growth of assets was very high when compared, for example, with commercial banks. Between December 1982 and September 1984, FSLIC-insured institutions grew at an average annual rate of nearly 20 percent. This growth was not evenly spread across the industry. For example, state-chartered stock institutions grew at an average annual rate of about 40 percent for the same 2-year period, while mutual associations grew slower than the industry (tables 3 and 7, pp. 28 and 35).

On average, NWC participants had not recovered their financial health. Their GAAP net worth had fallen continuously, their profits were still negative, and as of September 1984, 56 of the set of 66 participating institutions (that existed through the entire period December 1982 to September 1984) were insolvent. Asset growth in these institutions lagged behind the industry, at an annual rate of 10 percent between December 1982 and September 1984.

#### INDUSTRY RESTRUCTURING

In the Monetary Control Act of 1980 and the Garn-St Germain Act of 1982, the Congress provided thrifts many new powers to enable them to restructure their assets and liabilities. On the asset side of the portfolio, there was an industry-wide shift away from mortgage loans and an increase in holdings of mortgage-backed securities (table 14, p. 46). Mortgage-backed securities are more liquid than mortgage loans because these securities are standardized with a stated yield and maturity. The other major asset change was a shift from fixed-rate (FRMs) to adjustable-rate mortgages (ARMs). After 1982, when data on ARMs were first reported, ARM holdings increased from about 7 percent to nearly 22 percent of assets, a 300 percent increase in just 2 years (table 20, p. 56). Overall, net mortgage holdings (mortgage loans plus mortgage-backed securities) of FSLIC-insured institutions fell about 11.5 percent between December 1977 and September 1984, from 85.6 percent to 74.1 percent (table 14, p. 46).

Increased authority to make consumer and commercial loans were also among the new powers granted to thrifts. These powers, which have the potential to make thrifts much more like banks, have received a great deal of public attention. Nevertheless, our results confirm other studies showing that the industry, on average, did not move quickly into these areas. Just over 4 percent of industry assets were held as consumer and commercial loans combined in September 1984 (table 17, p. 51).

On the liability side, the industry's reliance on deposits decreased, while uses of FHLB advances and other borrowed money

increased over the whole period from December 1977 to September 1984 (table 21, p. 59). Reliance on small deposits, particularly passbook savings, decreased. The portfolio share of negotiable certificates of deposit, time deposits, transaction and money market deposit accounts, and brokered deposits increased (table 24, p. 65).

Net worth declined over the full period, when measured using regulatory, generally accepted accounting principle or tangible net worth accounting concepts (table 27, p. 72 and figures 18, 19, and 20, pp. 75-77).

In general, gross income for the industry rose over the time period studied (figure 31, p. 101), but as expenses have risen more rapidly (figure 34, p. 115), the industry was unprofitable during 1981 and 1982 and was only marginally profitable in 1983 and 1984 as compared, for example, to profits in 1977, 1978, and 1979 (figure 35, p. 120).

#### RESTRUCTURING BY THE NET WORTH CERTIFICATE PARTICIPANTS

Participants in the Net Worth Certificate program, in general, did less restructuring of their assets and liabilities than either the rest of the industry or the set of eligible nonparticipants. For example, participants made a smaller reduction in their dependence on mortgage loans and contracts (tables 14, 15, 16, pp. 46-48 and figures 7 and 8, pp. 49-50). They made a smaller shift toward commercial loans (tables 17, 18, and 19, pp. 51-53 and figure 10, p. 55) and toward liquid assets (figure 9, p. 54). They continued to rely more heavily on fixed-rate mortgages and used adjustable-rate contracts less, on average, than the other two groups (table 20, p. 56 and figure 11, p. 57).

In terms of liabilities, participants maintained a greater reliance on deposit sources of funds (figure 12, p. 62), particularly on small deposits (figure 15, p. 68) and passbook savings deposits (table 24, p. 65).

Participants' net worth position was worse than that of the two comparison groups, on average, regardless of which net worth concept is examined (tables 27, 28, and 29, pp. 72-74 and figures 18, 19, and 20, pp. 75-77).

NWC participants expenditures closely paralleled those of the two comparison groups (figure 34, p. 115). Total expense ratios were approximately equal to eligible nonparticipant

ratios throughout the period while slightly below the industry averages before 1981 and somewhat above them until the third quarter of 1984 (table 51, p. 114). NWC participants' income, however, was consistently below both the industry and nonparticipants' averages (figures 32 and 33, pp. 102-103). In particular, participants earned the lowest of the three groups' rates of return on mortgages (figure 28, p. 97). Consequently, NWC participants were, throughout the period studied, less profitable than the other two groups. In fact, they were unprofitable from the beginning of 1980 through the third quarter of 1984 (when our data end)(table 55, p. 122). Correspondingly, their net worth position (as measured by regulatory, GAAP, or tangible net worth) declined in all but one period from the end of 1979 onward (table 28, p. 73). In fact, GAAP net worth was negative on average for the group and still declining from mid-1982 onward.

#### LIMITATIONS OF THE PRESENT STUDY

In the present study we computed totals and averages (means) for the industry and for the two subgroups, NWC participants and eligible nonparticipants. We did not look at the behavior of individual institutions or at the variation around the mean values. We also made no attempt to empirically analyze, or explain, the results we found.

The data used to generate our results were derived from tapes produced by the FHLBB. We verified consistency between our data and those contained on the Bank Board's tapes. We did not check the accuracy of the Bank Board's coding and transcription, nor did we check the accuracy of the Financial Statements prepared by the thrift institutions themselves.

Copies of this report are being sent to the Chairman of the Federal Home Loan Bank Board and the Director of the Federal Savings and Loan Insurance Corporation. We will also make copies available to other interested parties upon request.

## ABBREVIATIONS

FHLB	Federal Home Loan Bank
FHLBB	Federal Home Loan Bank Board
FSLIC	Federal Savings and Loan Insurance Corporation
GAAP	Generally Accepted Accounting Principles
ENP	Eligible Nonparticipant
EP	Eligible Participant in the Net Worth Certificate program
MMDA	Money Market Deposit Account
RAP	Regulatory Net Worth
S&L	Savings and Loan Association
SB	Savings Bank
TAP	Tangible Net Worth

## GLOSSARY

Accrued Net Worth Certificates	Capital certificates that will be issued by the institution to the FSLIC at the end of the current reporting period. Only those institutions that have received written assurance of NWC purchases from their Supervisory Agent may make such accruals.
Adjustable Rate Mortgages	Refers to first mortgage loans whose interest rates may be periodically adjusted during the life of the mortgage.
Appraisal Increment	The excess of appraised value over net book value of any office, land, or building owned by a service corporation of a thrift.
Appraised Equity Capital	The excess of appraised value over book value of office land, buildings and improvements of the insured institution or of any of its subsidiaries. The appraisal is a "one time only" appraisal as permitted by the institution's principal regulator.
Assets	Total S&L assets consist of mortgage loans and contracts, nonmortgage loans, repossessed assets, real estate investments, liquid assets, fixed assets, and "other" assets.
Brokered Deposits	Deposits received from brokers or dealers for the account of others.
Charter Types	FSLIC-insured institutions may be federally or state chartered. They may have mutual or stock ownership. They include savings and loan associations and savings banks.
Commercial Loans	Secured and unsecured loans for commercial purposes. They exclude mortgage loans and include construction loans and overdrafts to commercial demand deposits.

Consumer Loans	Loans on deposits, home improvement loans, education loans, consumer auto loans, other closed-end consumer loans, credit card and other open-end consumer credit, and mobile home loans.
Contra-Assets	Contra-assets to mortgage or nonmortgage loans consist of loans in process, unearned discounts and deferred loan fees, and specific reserves and valuation allowances. Contra-assets are subtracted from the gross value of mortgage or nonmortgage loan values to obtain net values.
Deposits	Passbook accounts, transaction accounts, certificates of deposits, and other deposits.
Deferred Losses	An FHLBB regulation permits FSLIC-insured institutions to defer over time any losses (or gains) incurred on the sale of assets.
Direct Investments	Real estate investments acquired or held for development, resale, or investment.
Eligible Nonparticipants	A set of 577 institutions, their names provided by the FHLBB, that met the major criteria for eligibility to participate in the Net Worth Certificate program as of 12/82 and 6/83. That is, they had regulatory net worth between 0.5 percent and 3.0 percent of assets and had incurred losses in the two previous quarters. Given a careful consideration of all the conditions for eligibility, it is likely that some of these institutions would not have proven to be eligible for the program. Thus, it might be more correct to call them potentially eligible nonparticipants. Nevertheless, these institutions are generally similar to each other and relatively similar in their income and net worth positions to the actual participants in the Net Worth Certificate program.

Eligible Participants	In our study we use a set of 67 institutions that, according to a list given us by the FHLBB, had received net worth certificates prior to 1984. Since that date, more institutions have received NWCs. Two institutions that received NWCs early in the program were omitted from the Bank Board's list and are therefore omitted from our data set. One other omission from the list of NWC participants should also be noted. We removed several institutions that had acquired their NWCs by merger rather than by application.
Expense	FSLIC-insured institutions report their expenditures either as operating expense, interest charges, or nonoperating expense.
FHLB Advances	All borrowings from a Federal Home Loan Bank.
Federally Chartered	S&Ls or savings banks that received their charters from the Federal Home Loan Bank Board.
Fixed Assets	The net value of office buildings, land, and improvements that the institution owns and uses for the transaction of its business.
Fixed-Rate Mortgages	First mortgage loans that have neither a variable-rate nor a balloon payment but rather an interest rate that does not change over the entire term of the loan.
Futures/Options Hedging Assets/Liabilities	Contracts made for the future delivery of an item at a fixed date for a fixed price. The buyer of a futures contract will typically make an offsetting sale of the contract before the contract matures.

GAAP Net Worth	The sum of preferred stock; permanent, reserve, or guaranty stock; paid-in surplus; income capital certificates; reserves; retained earnings; and net undistributed income; less deferred net losses (gains) on loans and other assets sold. These items are recognized under the Generally Accepted Accounting Principles defined by the Financial Accounting Standards Board.
Goodwill and Other Intangible Assets	The premium over book value of an institution's assets that an acquiring institution pays during a merger or acquisition.
Gross Mortgage Loans and Contracts	The book value of mortgage loans and mortgage-backed securities before the subtraction of contra-assets.
Income	FSLIC-insured institutions report their earnings as operating or nonoperating income.
Income Capital Certificates	Certificates issued to the FSLIC by institutions seeking supplementary net worth. A regulatory program conceived and operated by the FSLIC.
Liabilities	Consist of deposits, borrowings, and other liabilities.
Liquid Assets	Cash, demand deposits, U.S. government and agency securities, other financial investments (including mortgage-backed securities that are not pass-throughs), and accrued interest receivable.
Money Market Deposit Accounts	Accounts mandated by the Garn-St Germain Act that are of unspecified maturity, pay unregulated interest rates, and have limited transactions features.
Mortgage Loans	Loans that are secured by property, specifically residential property. Typically the principal asset of an S&L or SB. They may be guaranteed by the Federal Housing Administration or the Veterans' Administration. Where not guaranteed they are called "conventional loans."

Mortgage-backed Securities (Bonds)	Consist only of securities of the pass-through type. (Nonpass-throughs are included as financial investments.) These securities are backed by a bundle of mortgages and are designed to appeal to investors that would not normally hold mortgages for investment. Mortgages can be prepaid and, thus, the actual maturity is not under the control of the investor. Mortgage-backed securities have a pre-determined maturity that is not affected by the mortgagee's action. Moreover, the yield and the value of the security are known to the investor, reducing uncertainty and making the investment more attractive.
Mortgage Loans and Contracts	Gross mortgage loans and contracts consist of mortgage loans and mortgage-backed securities. Excluding contra-assets to mortgage loans produces net mortgage loans and contracts.
Mutual Capital Certificates	A regulatory creation of the FHLBB allowing mutual institutions to increase their regulatory net worth.
Negotiable CDs	Negotiable certificates of deposit with balances greater than \$100,000.
Net Mortgage Loans and Contracts	Gross mortgage loans and contracts less contra-assets to mortgage loans and contracts.
Net Worth Certificates	Created by the Garn-St Germain Act, these certificates are issued by a qualified FSLIC-insured institution to the FSLIC for the purpose of increasing the institution's regulatory net worth.
Nonoperating Expense	The provision for losses on the sale of real estate, investment securities, loans, and other assets.
Nonoperating Income	Profit earned from the sale of real estate, investment securities, loans and other assets.

**Operating Expense**

Directors' fees; officers' and employees' compensation; legal expense; directors', officers', and employees' expense; office occupancy expense; furniture, fixtures, equipment and automobile expense; advertising; commissions and fees paid; amortization of goodwill and of deferred losses; and other operating expense.

**Operating Income**

Consists of interest earned, fees received, amortized deferred gains, and net income received from real estate owned, from service corporations and subsidiaries, and from leasing operations.

**Other Borrowed Money**

Consists of loans from commercial banks, reverse repurchase agreements, consumer retail repurchase agreements, overdrafts in an institution's demand deposit assets, commercial paper issued, subordinated debentures not qualifying for net worth, mortgage-backed bonds issued, and other borrowings.

**Passbook Savings Accounts**

Deposits that are not of fixed maturity and are not transaction accounts nor money market deposit accounts.

**Pass-through Securities (Mortgage-backed)**

Instruments backed by mortgages which repay principal and interest to the holder regardless of whether it has been collected on the mortgages.

**Permanent, Reserve, or Guaranty Stock**

Par value of common stock outstanding.

**Qualifying Subordinated Debentures**

Subordinated debt determined by FHLBB regulation as qualifying for inclusion in net worth.

Regulatory Net Worth	The sum of preferred stock; permanent, reserve, or guaranty stock; paid-in surplus; qualifying mutual capital certificates; qualifying subordinated debentures; appraised equity capital; net worth certificates; accrued net worth certificates; income capital certificates; reserves; undivided profits (retained earnings); and net undistributed income.
Repurchase Agreements (Repos)	Securities bought or sold under the agreement to resell or repurchase at a future date. Also referred to as reverse repos.
Small Deposits	Deposits less than or equal to \$100,000 in denomination.
State-Chartered	S&Ls or SBs that are chartered by a state, rather than by the FHLBB.
Subordinated Debentures	Reported as "borrowings" where their remaining period to maturity is less than one year or when not qualifying as net worth.
Tangible Net Worth	Equals GAAP net worth (see above) less goodwill and other intangible assets.
Time Deposits	Deposits of stated, fixed maturity.
Transaction Accounts	Demand deposits, negotiable order of withdrawal (NOW) accounts, super NOW accounts, and other transaction accounts.
Valuation Allowances	Reserves established to adjust the book values of assets.

**ASSET GROWTH, CHARTER DISTRIBUTION,  
AND NET WORTH CERTIFICATE DISTRIBUTION**

Source: FHLBB Semiannual and Quarterly Financial Statements, 1977-1984.

Note: <sup>a</sup>The information in our records which identifies each individual institution is the information which was reported on the September 1984 FHLBB Quarterly Financial Statement or on the last FHLBB Report of Condition prior to an institution's failure. It does not identify any prior changes, such as merger involvement (acquired or acquiring) or charter conversions, that may have occurred. Thus, if an S&L switched from a federal mutual to a federal stock charter in 1983, for instance, that institution is treated as having a federal stock charter type throughout our sample period (1977-84).

Total number of institutions insured by the FSLIC:

Source: FHLBB Semiannual and Quarterly Financial Statement, September 1984.

Notes: <sup>a</sup>See table 1, note <sup>a</sup> for a discussion of charter-type conversions and mergers in our data set.

<sup>b</sup>Our set of net worth participants consists of 67 institutions that received Net Worth Certificates prior to 1984. Two other institutions that received NWC early in the program are not included in our set because the FHLBB did not inform us of their participation. We have also deleted some institutions from our list because they acquired their NWC through merger and may not, themselves, have been eligible to participate in the program.

<sup>c</sup>The eligible nonparticipants are institutions that appeared to meet the major criteria of eligibility for Net Worth Certificates as determined by the FHLBB as of mid-1983.

Notes: <sup>a</sup>See table 1, note <sup>a</sup> for a discussion of charter-type conversions and mergers in our data set.

<sup>b</sup>Insolvent institutions are those having less than zero net worth, as measured under GAAP in September 1984.

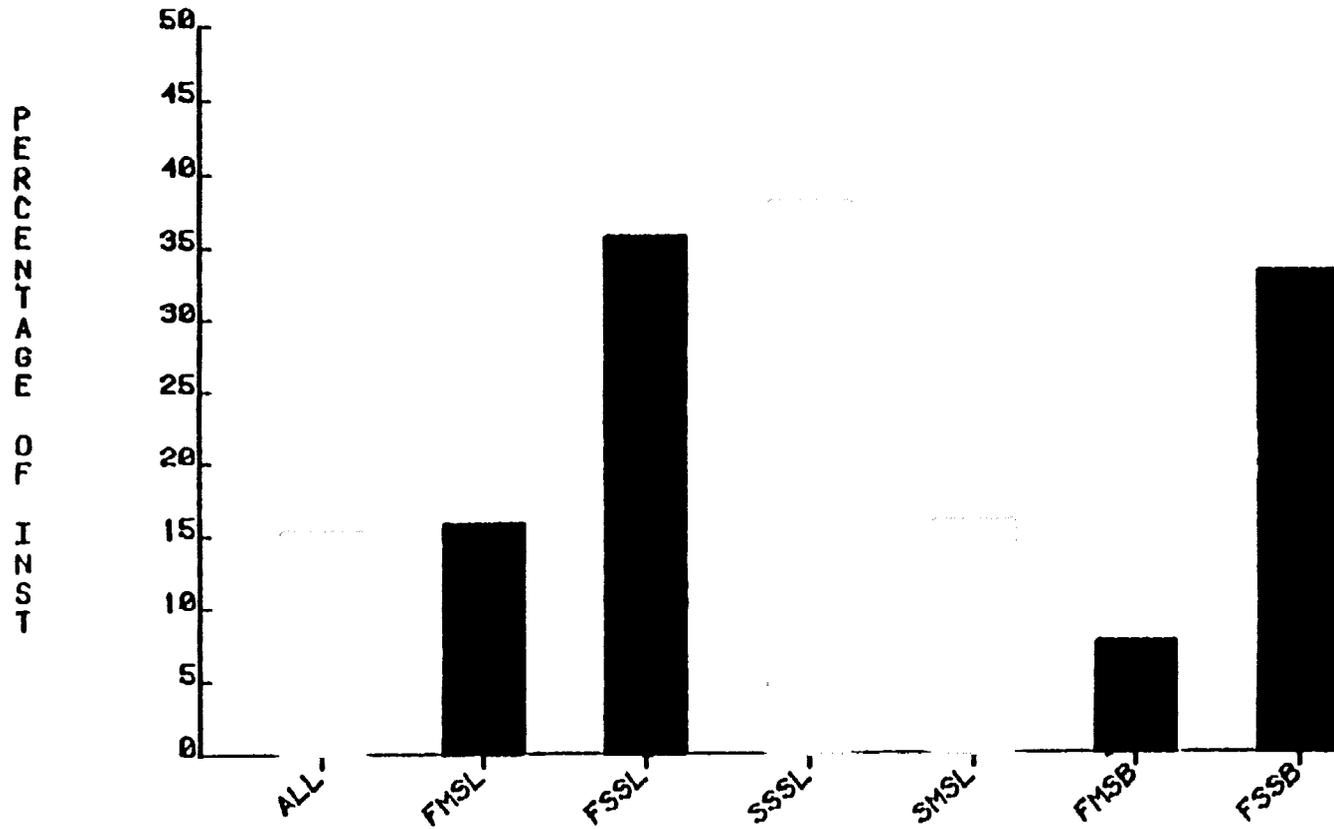

<sup>c</sup>This table includes only those institutions having positive assets at both the beginning and the end of the period. Thus, three fewer institutions are included than the total number of insolvent institutions existing in September 1984.

<sup>d</sup>The percentage growth rates of total assets are for the period December 1982 through September 1984. Data are for savings and loan associations (S&Ls) and savings banks (SBs) that have federal mutual (FM), federal stock (FS), state stock (SS) or state mutual (SM) charters.

<sup>e</sup>Percentages may not sum to 100.0 because of rounding.

## Notes:

<sup>a</sup>This table includes only those institutions having positive assets at both the beginning and the end of the period. Thus, the number of institutions included is 96 fewer than the total number of institutions existing September 1984.

<sup>b</sup>Insolvent institutions are those having negative GAAP net worth in September 1984.

<sup>c</sup>Low net worth associations are those with GAAP net worth between 0 and 3 percent in September 1984.

<sup>d</sup>Growing at an annual percentage rate of 25 percent or more per annum over the period December 1982 through September 1984.

<sup>e</sup>"Other" indicates American Samoa, Guam, Northern Mariana Is., Puerto Rico, Trust Territory of the Pacific Is., and the U.S. Virgin Islands.

Wisconsin	1	100.0	0	0

Source: FHLBB Semiannual and Quarterly Financial Statements, December 1982 and September 1984.

Notes: <sup>a</sup>Our set of net worth participants consists of 66 institutions that received Net Worth Certificates (NWCs) before 1984 and that had positive assets in both December 1982 and September 1984. Two other institutions that received NWCs early in the program are not included in our set because the FHLBB did not inform us of their participation. We have also deleted some institutions from our list because they acquired their NWCs through merger and may not, themselves, have been eligible to participate in the program.

<sup>b</sup>This table includes only those institutions having positive assets at the beginning and the end of the period. Thus, the number of institutions included is one smaller than the total number of NWC participants in our data set as of December 1982.

<sup>c</sup>Institutions with negative GAAP net worth in September 1984.

<sup>d</sup>Institutions with GAAP net worth between 0 and 3 percent in September 1984.

<sup>e</sup>Growing at an annual percentage rate of 25 percent or more the period December 1982 through September 1984.

Notes: <sup>a</sup>Small deposits are deposits with balances less than \$100,000.

<sup>b</sup>Negotiable CDs are large negotiable deposits with balances over \$100,000.

<sup>c</sup>Time deposits are deposits having a fixed maturity.

<sup>d</sup>Includes negotiable order of withdrawal (NOW) accounts, Super NOW accounts, and demand deposits.

<sup>e</sup>Money Market Deposit Accounts (MMDAs) were authorized under the Garn-St Germain Act.

<sup>f</sup>Data are available semiannually through 1983.

<sup>g</sup>The downward trend of passbook savings is reversed here and in the subsequent two tables because MMDAs were first issued in December 14, 1982 and are included, for this period only, as part of Passbook Savings. The Federal Reserve Statistical Release, H.6, shows that MMDAs totaled \$16.8 billion or 2.45 percent of assets on December 31, 1982, only 2 weeks later.

<sup>h</sup>Data are available quarterly during 1984.

Notes: <sup>a</sup>The data on the components of liabilities sometimes vary widely from quarter to quarter, especially for groups smaller than all institutions. Thus, attention should be focused on the general trend of the liability categories rather than on the values in particular time periods.

<sup>b</sup>Small deposits are deposits with balances less than \$100,000.

<sup>c</sup>Negotiable CDs are large negotiable deposits with balances over \$100,000.

<sup>d</sup>Time deposits are deposits having a fixed maturity.

<sup>e</sup>Includes negotiable order of withdrawal (NOW) accounts, Super NOW accounts, and demand deposits.

<sup>f</sup>Money Market Deposit Accounts (MMDAs) were authorized under the Garn-St Germain Act.

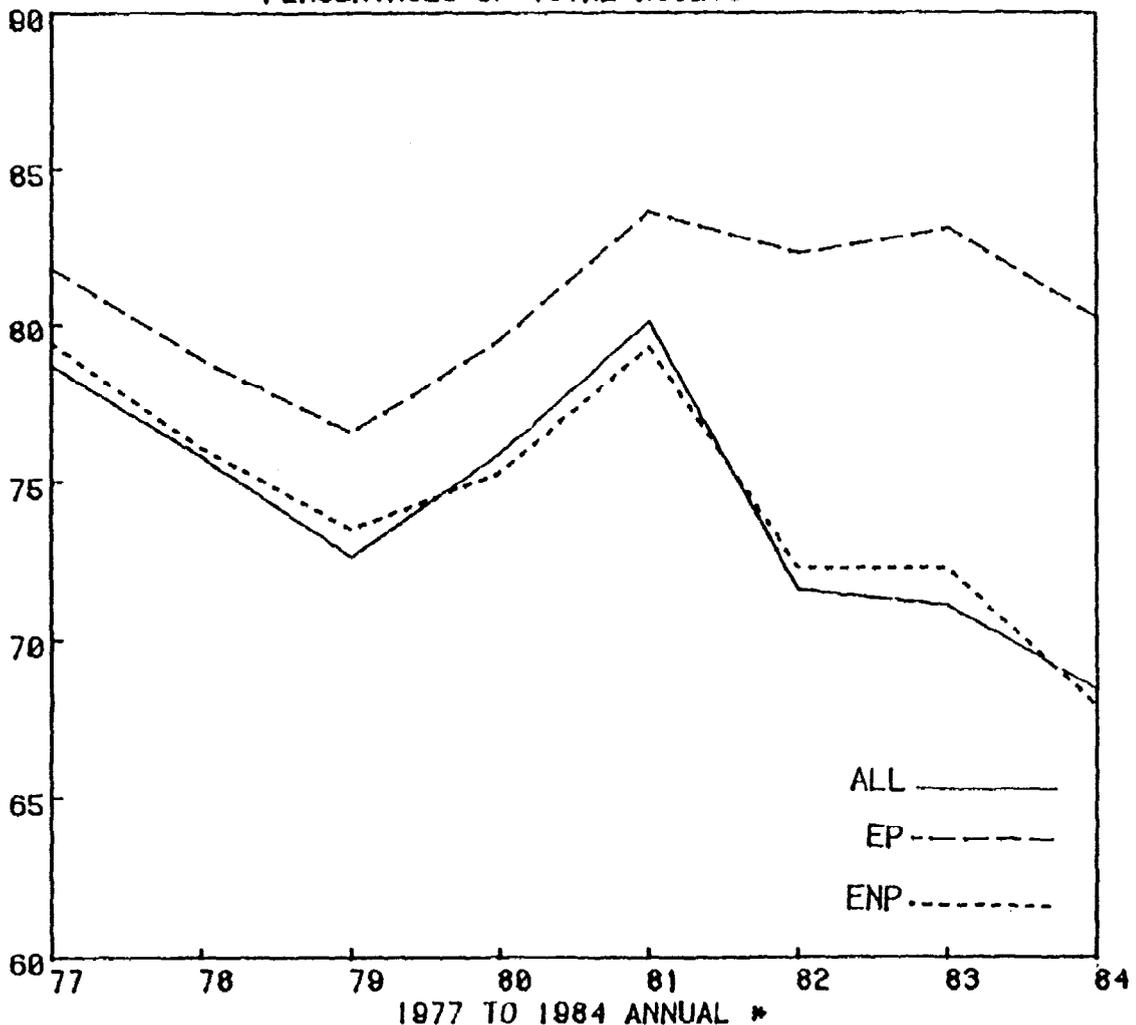

<sup>g</sup>Data are available semiannually through 1983.

<sup>h</sup>Data are available quarterly during 1984.

Notes: <sup>a</sup>Some institutions in our set of eligible nonparticipants have net worth certificates. The Bank Board provided us with a list of participants from which some participating institutions were excluded. They have since attempted to improve their list of participants. However, the most recent list provided to us by the Bank Board, as of 12/31/84, did not show at least two institutions that had a total of \$37.5 million in net worth certificates.

<sup>b</sup>Deferred net losses gains on loans and other assets sold.

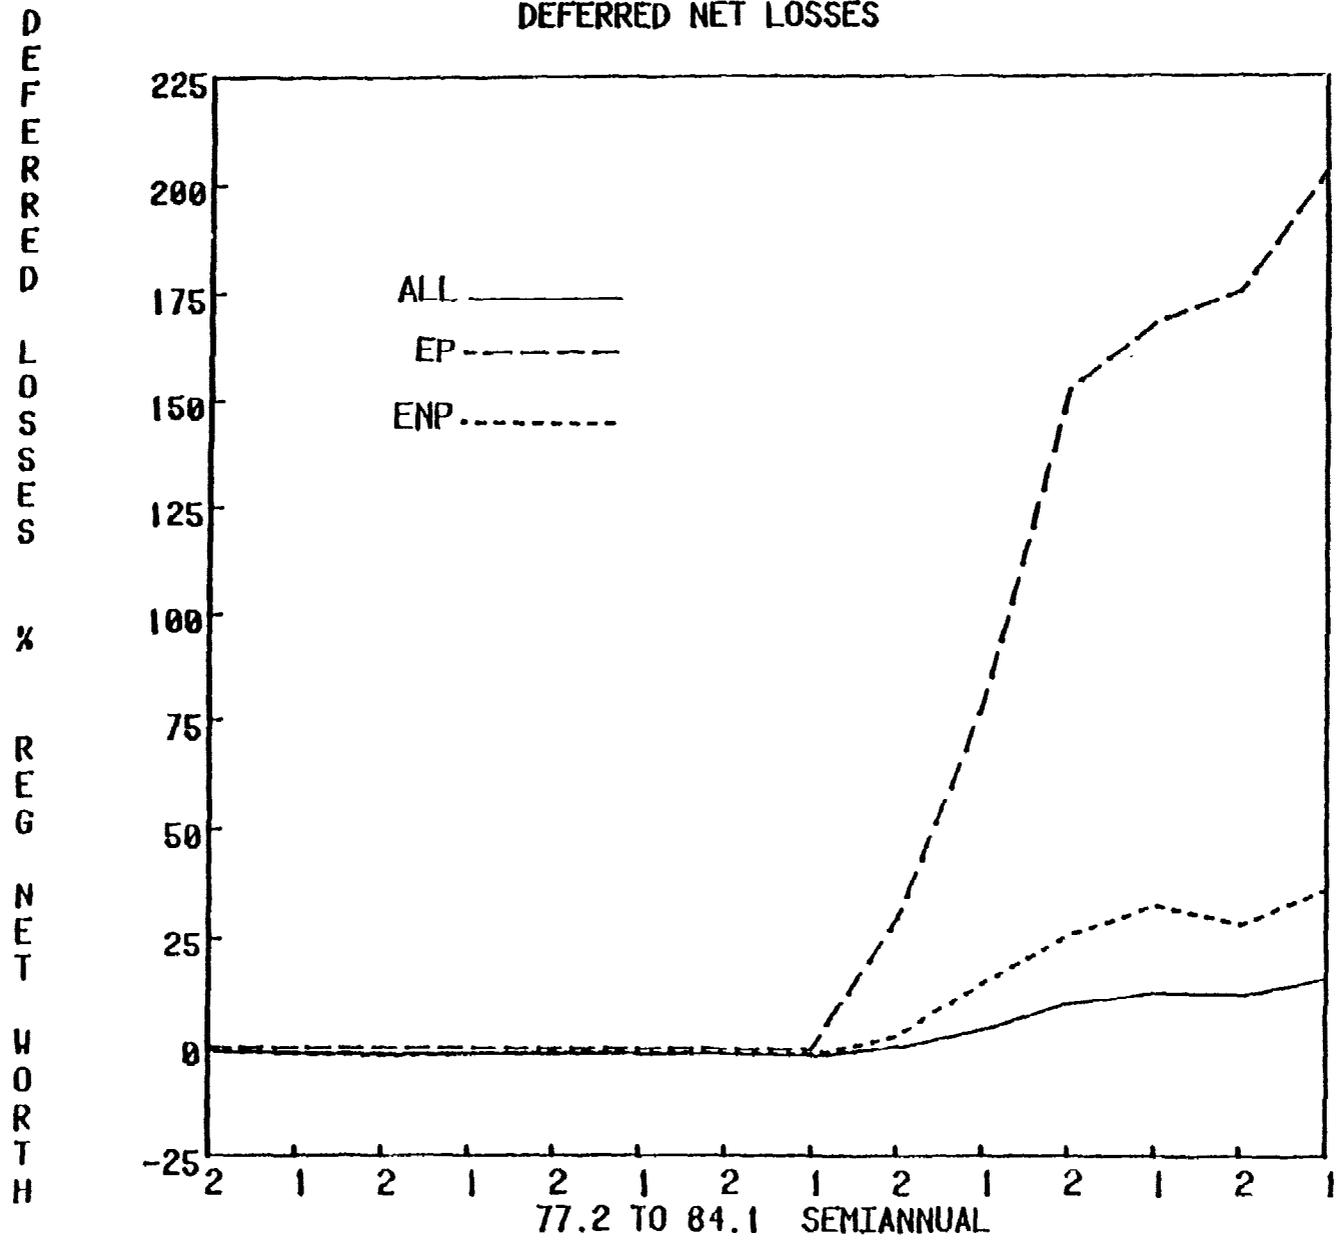

<sup>c</sup>Goodwill and other intangible assets.

<sup>d</sup>Data are available semiannually through 1983.

<sup>e</sup>Data are available quarterly during 1984.

## Notes:

<sup>a</sup>See table 2, note <sup>b</sup> for a description of our set of Net Worth Certificate Participants.

<sup>b</sup>Operating income is the sum of interest on mortgage loans and contracts; interest on mortgage-backed pass-through securities; discounts on mortgage loans; interest on commercial loans, consumer loans, interest and dividends on investments and deposits; income from financing leases; mortgage loan fees; loan servicing fees; other loan fees; fees and service charges on transaction accounts; amortized deferred gains on futures and options hedging assets and hedging liabilities; net income from office building operations, real estate held for investment, repossessed real estate operations, service corporations and subsidiaries; leasing operations; and all other operating income.

<sup>c</sup>Nonoperating income is the sum of profits from the sale of foreclosed real estate, other repossessed property, other real estate held, investment securities, loans, and other assets; amortized deferred gains on loans sold, and other assets sold; and other nonoperating income.

<sup>d</sup>Data are available semiannually through 1983.

<sup>e</sup>Data are available quarterly during 1984.

Notes: <sup>a</sup>Average rates of return shown above for particular asset types are approximations. They are calculated by dividing each income type by the corresponding asset type. These numbers can be affected by the timing of changes in the stocks and flows involved and by abrupt changes in the small numbers found in some categories, particularly when looking at a subset of the industry.

<sup>b</sup>Liquid assets are cash, deposits, and investment securities.

<sup>c</sup>Data available semiannually through 1983.

Source: FHLBB Semiannual and Quarterly Financial Reports, 1977-1984.

Notes: <sup>a</sup>Includes directors' fees; office and employee compensation; legal expense; directors', officers', and employees' expense; office occupancy expense; advertising; commissions paid for deposits; professional services; loan services fees; amortization of goodwill; amortized deferred losses on futures and options; and other operating expense.

<sup>b</sup>Interest charges on deposits less penalties for early withdrawal, advance payments by borrowers for taxes and insurance, advances from FHLB, subordinated debentures, mortgage-backed bonds, and other borrowed money, less capitalized interest.

<sup>c</sup>Includes provisions for losses and losses on foreclosed real estate, other repossessed property; other real estate held, investment securities, loans, and other assets. Also includes amortized deferred losses on loans and other assets sold, and other nonoperating expense.

<sup>d</sup>Income taxes include federal, state, and local taxes.

<sup>e</sup>May not sum to 100 because of rounding.

<sup>f</sup>Data are available semiannually through 1983.

<sup>g</sup>Data are available quarterly in 1984.

Notes: <sup>a</sup>The average interest rates paid on liabilities shown above are calculated by dividing each expense type by the corresponding liabilities type. These numbers can be affected by the timing of changes in the stocks and flows involved, as well as by the small numbers found in some categories. This is particularly true when looking at subsets of the industry.

<sup>b</sup>Data represent average annual interest rates paid.

<sup>c</sup>Data are available semiannually through 1983.

<sup>d</sup>Data are available quarterly during 1984.

Notes: <sup>a</sup>See table 2, note <sup>b</sup> for a description of our set of Net Worth Certificate Participants.

<sup>b</sup>Regulatory net worth was positive for each group throughout the period. Hence, positive ratios reflect positive income and net worth while negative ratios reflect negative net income.

<sup>c</sup>Data are available semiannually through 1983.

<sup>d</sup>Data are available quarterly during 1984.
