ACQUISITION/ FINANCIAL SYSTEMS INTERFACE REQUIREMENTS

Checklist for Reviewing Systems under the Federal Financial Management Improvement Act

This is a work of the U.S. government and is not subject to copyright protection in the United States. It may be reproduced and distributed in its entirety without further permission from GAO. However, because this work may contain copyrighted images or other material, permission from the copyright holder may be necessary if you wish to reproduce this material separately.

PREFACE

June 2004

The Federal Financial Management Improvement Act of 1996 (FFMIA) requires that agencies implement and maintain financial management systems that substantially comply with federal financial management system requirements. These requirements are described in detail in the Office of Management and Budget's (OMB) guidance¹ and in the Federal Financial Management System Requirements series issued by the Joint Financial Management Improvement Program (JFMIP). JFMIP intends for its requirements series to promote understanding of key financial management systems concepts and requirements, to provide a framework for establishing integrated financial management systems that support program and financial management systems.

This checklist reflects JFMIP's *Acquisition/Financial Systems Interface Requirements* (JFMIP-SR-02-02, June 2002), a publication that addresses the shared information requirements between federal financial and acquisition management systems. We are issuing this checklist to assist (1) agencies in planning, implementing, and monitoring their federal financial and acquisition management systems and (2) managers and auditors in reviewing their federal financial and acquisition management systems interfaces to determine if they substantially comply with FFMIA.

JFMIP's requirements publication and this checklist address only the shared information requirements between financial and acquisition management systems; they do not address those system requirements that are associated solely with the acquisition or financial process. For procurements, the four basic processes between acquisition and finance covered by this interface checklist are funds certification, funds obligation/de-obligation, payment, and contract closeout. In addition, the checklist has a separate section on one particular procurement method, micropurchases made with purchase cards, which generally requires more limited interface with finances than do other procurements.

This checklist is not required to be used by those assessing acquisition and financial systems interfaces. Rather, it is provided as a tool for use by experienced staff and is one in a series of documents we have issued to assist agencies in improving or maintaining effective operations. (See the last page of this document for a list of related products.) This checklist, the JFMIP

¹ OMB Memorandum for Heads of Executive Departments and Establishments, Chief Financial Officers, and Inspectors General, Jan. 4, 2001, Revised Implementation Guidance for the Federal Financial Management Improvement Act of 1996, and OMB Circular No. A-127, revised July 23, 1993, Financial Management Systems (31 U.S.C. sec. 3512 note (2000) (Federal Financial Management Improvement)).

requirements publication, and the two previously mentioned OMB documents should be used concurrently. Those using this tool must apply experienced judgment in its interpretation and application. They should consider the impact of the entire completed checklist in determining whether the interface substantially complies with requirements.

This checklist is available on the Internet at <u>http://www.gao.gov</u> under "Other Publications" and the subheading "Accounting and Financial Management." Copies of the JFMIP requirements document can be downloaded from the Internet at <u>http://www.jfmip.gov</u> under "JFMIP Documents" and the subheading "System Requirements."

Jeffrey C. Steinhoff Managing Director Financial Management and Assurance

TIN	taxpayer identification number
U.S.C.	United States Code

OVERVIEW

The Federal Financial Management Improvement Act of 1996 (FFMIA) requires, among other things, that agencies implement and maintain financial management systems that substantially comply with federal financial management systems requirements. These requirements are detailed in the Office of Management and Budget's (OMB) Circular No. A-127, Revised July 23, 1993, *Financial Management Systems*; in OMB's Memorandum for Heads of Executive Departments and Establishments, Chief Financial Officers, and Inspectors General, January 4, 2001, *Revised Implementation Guidance for the Federal Financial Management Improvement Act of 1996*;² and in the Federal Financial Management System Requirements (FFMSR) series issued by the Joint Financial Management Improvement Program (JFMIP).³

In support of FFMIA, JFMIP has published separate requirements documents for 13 different systems (including one for the interface between the acquisition system and the financial system) that might be found at federal agencies. It also has published a financial management systems framework document⁴ that sets forth the vision, desired capabilities, performance outcomes, environment and other attributes that all federal financial management systems must be designed to support.

JFMIP describes three categories of agency financial management systems: (1) core financial systems, (2) other financial and mixed systems (including acquisition management systems), and (3) departmental executive information systems (systems to provide management information to all levels of management). Figure 1 depicts the JFMIP model that illustrates how the three categories of agency financial management systems interrelate in an agency's overall systems architecture.

 $^{^2}$ 31 U.S.C. sec. 3512 note (2000) (Federal Financial Management Improvement).

³ JFMIP is a joint undertaking of OMB, GAO, the Department of the Treasury, and the Office of Personnel Management (OPM), working in cooperation with each other and with operating agencies to improve financial management practices throughout the government. The program was initiated in 1948 by the Secretary of the Treasury, the Director of the Bureau of the Budget (now OMB), and the Comptroller General. JFMIP was authorized by the Budget and Accounting Procedures Act of 1950 (subsequently codified at 31 U.S.C. sec. 3511(d) (2000)). The Civil Service Commission, now OPM, joined JFMIP in 1966.

⁴ Joint Financial Management Improvement Program, *Framework for Federal Financial Management Systems*, JFMIP-SR-01-04 (Washington, D.C.: April 2004).

Figure 1: Agency Financial Management Systems Architecture

Source: JFMIP Acquisition/Financial Systems Interface Requirements (June 2002).

As can be seen in figure 1, the acquisition system falls into the JFMIP category of mixed systems. JFMIP's interface requirements document⁵ covers the financial aspects of the acquisition system. This checklist is based on, and parallels, JFMIP's interface requirements document.

Both JFMIP's interface requirements document and this checklist address only the shared information requirements between financial and acquisition management systems; they do not address system requirements that are associated solely with the acquisition or financial process. For procurements, the four basic processes between acquisition and finance covered by this interface checklist are funds certification, funds obligation/de-obligation, payment, and contract closeout. In addition to covering the four procurement processes that interface with finance, the checklist has a separate section on the interface between finance and one particular procurement method, micropurchases made with purchase cards, which generally requires more limited interface with finances than do other procurements.

We are issuing this checklist to assist (1) agencies in planning, implementing, and monitoring their federal financial and acquisition management systems and (2) managers and auditors in reviewing their federal financial and acquisition

⁵ Joint Financial Management Improvement Program, *Acquisition/Financial Systems Interface Requirements*, JFMIP-SR-02-02 (Washington, D.C.: June 2002).

management systems interfaces to determine if they substantially comply with FFMIA. However, this checklist is not required to be used in assessing acquisition and financial systems or their interfaces. Rather, it is provided as a tool for use by experienced staff and is one in a series of documents we have issued to assist agencies in improving or maintaining effective operations. (See the last page of this document for a list of related products.) This checklist, the JFMIP requirements document, and the two previously mentioned OMB documents should be used concurrently. Those using this tool should apply experienced judgment in its interpretation and application. They should consider the impact of the entire completed checklist in determining whether the interface substantially complies with requirements.

Authoritative Guidance

OMB Circular No. A-127; OMB Circular No. A-123, June 21, 1995, *Management Accountability and Control;* and OMB Circular No. A-130, revised Nov. 28, 2000, *Management and Federal Information Resources* which are cited in OMB Circular No. A-127; and OMB's Memorandum for the Heads of Executive Departments and Establishments, Chief Financial Officers, and Inspectors General, Jan. 4, 2001, *Revised Implementation Guidance for the Federal Financial Management Improvement Act*, provide the basis for assessing compliance with FFMIA requirements. The OMB guidance identifies various criteria that an agency must meet to be in substantial compliance with FFMIA requirements. One set of criteria listed in the OMB guidance is the JFMIP system requirements series.

JFMIP's interface requirements document was developed as part of its system requirements series created in partnership with representatives from the acquisition and financial management functions governmentwide. The Procurement Executive Council and the Chief Financial Officer's (CFO) Council represent the acquisition and financial communities, respectively, from a wide range of major federal agencies, and both participated in the development of the interface requirements document.

The source of all of the questions in this checklist is the JFMIP's *Acquisition/Financial Systems Interface Requirements* (JFMIP-SR-02-02, June 2002). This JFMIP requirements document outlines the existing governmentwide statutory and regulatory requirements associated with the mutual functional interfaces between finance and acquisition. It does not, however, contain agency-unique mission requirements that relate to acquisition or finance. Each federal agency must, therefore, use the JFMIP functional requirements, in conjunction with any agency-unique mission requirements, in planning its financial management and acquisition systems improvement projects.

JFMIP cautions that the acquisition and financial management systems interface functionality does not necessarily reside in a single software application or functional system. In fact, the interface information may reside in a number of applications or systems, whether automated or manual. It should be noted that this checklist is based on the existing JFMIP published requirements and that any changes in the laws, regulations, and standards and practices since the requirements were published are not reflected in this checklist.

The JFMIP interface requirements publication, and this checklist, segregate functional requirements into two general categories: *mandatory* and *value-added*. The mandatory requirements describe capabilities that the systems interface must have. They constitute the minimum acceptable functionality necessary to establish an acquisition and financial systems interface and are based on federal laws, regulations, directives, or judicial decisions. Mandatory requirements are those against which agency heads are to evaluate their acquisition and financial systems interfaces to determine substantial compliance with systems requirements under FFMIA. These requirements apply to existing systems in operation and new systems planned or under development. JFMIP's interface publication signifies that a requirement is mandatory by using the word "must" in the requirement statement; this checklist uses "**M**" immediately following a question to indicate that the question represents a requirement that JFMIP has designated as mandatory.

Value-added requirements describe optional features or characteristics and may consist of any combination of the following: (1) using state-of-the-art technology, (2) employing the preferred or best business practices, or (3) meeting the special management needs of an individual agency. Agencies should consider value-added features when judging system alternatives. The need for these value-added features in agency systems is left to the discretion of each agency head. JFMIP's interface publication signifies that a requirement is value-added by using the word "should" in the requirement statement; this checklist uses "V" immediately following a question to indicate that the question represents a requirement that JFMIP has designated as a value-added requirement.

How to Use This Checklist

OMB's January 2001 revised implementation guidance provides CFOs and inspectors general with a means for determining whether their agencies' financial management systems substantially comply with federal financial management system requirements. The annual reporting requirement by 31 U.S.C. 3512(d) (2000) is one means of assisting agencies in the determination of substantial compliance. Agencies also can use this checklist as a tool to help determine compliance with federal financial management system requirements.

This checklist consists of three columns. The left column is already complete; the center and right columns are to be completed by the checklist user. The left column contains questions that have been derived from JFMIP's interface requirements. Each checklist question reflects a separate JFMIP requirement, and all of the JFMIP interface requirements are covered in the checklist. After reading a checklist question and executing whatever procedure or test is necessary to answer the question, the checklist user should enter a response in the center column. Each of the checklist questions should receive a response in the center column and no question should receive more than one response. Responses should typically be limited to "Yes," "No," or "N/A" (not applicable). A "Yes" response in the center column should indicate that the agency's acquisition and financial systems interface currently has the capability described in the question. A "No" response in the center column should indicate that the checklist question is applicable to this agency and the agency's acquisition and financial systems interface currently does not have the capability described in the question. The user should insert "N/A" in the center column only to indicate that a particular checklist question is not applicable to the agency whose system is being evaluated.

After responding to a checklist question with an entry in the center column, the user should consider whether to enter additional information in the right column. The checklist user should use the right column to support, explain, or elaborate on the response that was entered in the center column. For each "Yes" response, an entry in the right column might contain a brief description of how the agency's acquisition and financial systems interface provides the capability cited in the checklist question, a source that explains or shows the capability, or a description of the procedure or test that confirmed the existence of the capability.

For a "No" response, the right column should provide an explanation (e.g., "the agency's management believes the capability is not cost-effective and will not seek to add this capability") or elaboration (e.g., "the agency is working on modifying its systems interface to have the capability available in subsequent years,"), and, where applicable, a reference to any related supporting documentation (e.g., the title and date of a cost-effectiveness study). For "N/A" responses, the right column should provide an explanation of why the checklist question is not applicable to the agency's systems interface.

Completing this checklist can assist agencies in their evaluations of whether specific acquisition and financial systems interface requirements are being met. However, in evaluating the checklist results to determine whether they indicate substantial compliance with requirements, those using this tool must apply experienced judgment in its interpretation and application. Checklist users should assess the acquisition and financial systems interface based on the results of the completed checklist taken as a whole.

Responses of "No" should not be taken out of context, and checklist users should not expect a neat mathematical formula (such as less than 5 percent of questions with responses of "No" indicates substantial compliance) to provide a quick answer. Rather, "No" responses should be assessed as to their effect, individually and in aggregate, on the interface's overall compliance with federal requirements. Some checklist questions, those followed by "**M**," represent interface requirements that JFMIP has designated as mandatory; that is, the requirements against which agency heads are to evaluate the interfaces to determine substantial compliance with systems requirements under FFMIA. The other checklist questions, those followed by "**V**," represent interface requirements that JFMIP has designated as value-added, that is, the requirements that agency heads need not consider to determine substantial compliance with systems requirements under FFMIA. In addition, certain questions within the checklist may not be applicable to the agency and those questions should not be considered in evaluating compliance with federal requirements. Furthermore, agency officials must also consider agency-unique mission requirements, in addition to the questions in this checklist, to determine whether the agency's interface is in substantial compliance with federal requirements.

ACQUISITION/FINANCIAL SYSTEMS INTERFACE REQUIREMENTS

JFMIP's acquisition and financial systems interface requirements document identifies the shared information requirements between the acquisition and financial management processes, and some general systems requirements and records retention requirements that apply to all financial and mixed systems (including acquisition management systems). The requirements are based upon statutes, regulations, or best practices and were deliberated and concurred upon by the acquisition and financial communities.

The shared information requirements, or interface requirements between acquisition and finance, that the requirements document delineates constitute information available in one system that is required for the performance of the other system, that is, information requirements critical to the performance of both the finance and the acquisition functions. The information interface requirements may take the form of a data element, a reporting need, an internal control, or an edit requirement.

In delineating the shared information requirements, the interface requirements document describes two alternative procurement methods that differentiate the processes that occur between acquisition and finance and define resulting interface systems requirements that occur. These alternative procurement methods are micropurchases made with purchase cards and all procurement transactions other than micropurchases made with purchase cards (referred to simply as "procurements").

The requirements document contains eight sections in which requirements are delineated. For procurements, the requirements document groups the interface requirements according to four basic processes that involve interfaces between the acquisition and finance functions. Those four processes are funds certification, funds obligation/de-obligation, payment, and contract closeout, and the requirements document contains separate sections for each of the four processes.⁶ For micropurchases made with purchase cards, processes, procedures, and information requirements differ from those used for procurements, and the requirements document delineates the micropurchases interface requirements in a separate section. The requirements document also

⁶ Although the requirements document includes obligation and de-obligation in a single procurement process, it discusses obligation requirements and de-obligation requirements in separate sections. The de-obligation section points out that information previously supplied for the original obligation <u>must be accessible</u> also for de-obligation if the requirements were categorized as mandatory for obligation, and <u>should be accessible</u> also for de-obligation if the requirements were categorized as value-added for obligation. In this checklist, we have enumerated the obligation requirements and the de-obligation requirements separately.

contains separate sections that delineate general systems requirements and records retention requirements that apply to all financial and mixed systems (including acquisition management systems).

The checklist questions follow the JFMIP requirements document, JFMIP-SR-02-02, June 2002, (page numbers referencing the source document follow each question), with eight sections containing requirements questions. The data elements identified in the requirements questions of the checklist's process sections include all data required to execute the identified functionality. In some cases, the same data element may appear in more than one functionality and in more than one process section in this checklist document, just as it does in the requirements document. This is to allow system developers to understand the entire set of data required for a specific functionality within an interface process. It is not meant to suggest multiple entries of data.

It should be noted that not all questions will apply in all situations and, as with the use of any checklist, professional judgment should be exercised. Using the JFMIP source document and its "Appendix B: Glossary," which defines terms used, along with OMB Circular No. A-127 and OMB's of January 4, 2001 memorandum, will help ensure that the user is cognizant of the background information necessary to fully understand the questions.

Funds Certification	Yes, No, or N/A	Explanation
 Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information: M (pp. 22-23) 		
a. Fiscal year?		
b. Appropriation or Treasury fund symbol?		
c. Organization code?		
d. Cost center?		
e. Object classification?		
f. Estimated amount?		
g. Project code?		
h. Program code?		
i. Purchase request (PR) number?		
j. Transaction date?		
k. Action code (original/new/ modification)?		
l. Subject-to-funds- availability indicator?		
m. Asset identifier code?		

Funds Certification	Yes, No, or N/A	Explanation
n. Contractor code or contractor name?		
o. Trading partner?		
p. Trading partner code?		
 2. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information: V (p. 23) a. Intra-governmental business partner code⁷? b. Interagency agreement number? c. Performance measure 		
code? d. Description?		
e. Estimated amounts increased and/or decreased?		
f. Revenue source code?		
g. Agency location code (ALC)?		

⁷ Intragovernmental business partner code is similar in concept to a vendor or contractor code and is an identifier for a federal entity engaged in acquiring products or services from another Federal entity or providing products or services to another Federal entity (p. 79). Access to this code will become a mandatory, rather than value-added, requirement upon issuance of governmentwide implementing standard requirements (p. 23).

	Funds Certification	Yes, No, or N/A	Explanation
3.	Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the estimated quantity associated with establishing the obligation, where applicable (such as for property or inventory purchases)? V (p.23)		
4.	Does the agency's single integrated financial management system provide the capability to enable: V (p. 23)		
	a. Electronic approvals?b. Electronic notification alerts?		
	c. Electronic point-of-entry automated requisition forms?		

Obligation	Yes, No, or	Explanation
 Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access: M (pp. 26-27) 	N/A	
a. Fiscal year?		
b. Appropriation or Treasury fund symbol?		
c. Organization code?		
d. Cost center?		
e. Object classification?		
f. Project code?		
g. Program code?		
h. Obligation amount?		
i. PR number?		
j. Funded through date (for those contracts that are incrementally funded)?		
k. Contract number (including modification number, if any)?		
 All associated delivery order numbers (including modification number, if any)? 		
m. All associated task order numbers (including		

Obligation	Yes, No, or	Explanation
	N/A	
modification number, if any)?		
n. Purchase order number (including modification number, if any)?		
o. Blanket purchase agreement (BPA) number (including modification number, if any)?		
p. All associated BPA call numbers (including modification number, if any)?		
q. Contractor name?		
r. Contractor taxpayer identification number (TIN)?		
s. Data Universal Numbering System (DUNS) identification?		
t. Interagency agreement number?		
u. Trading partner?		
v. Award (transaction) date?		
w. Effective date?		
x. Action code?		
y. Product or service description?		
z. Amounts increased, if any?		

	Obligation	Yes, No, or N/A	Explanation
	aa. Amounts decreased, if any?		
	bb. Subject to funds availability indicator?		
	cc. Asset identifier code?		
2.	Does the agency's single integrated financial management system use account definitions consistent with the account definitions in the U.S. Standard General Ledger (SGL)? M (p. 27)		
3.	If the agency's single integrated financial management system uses any expansion to the chart of accounts in the SGL, does the system roll the expanded accounts up to the accounts defined in the SGL? ⁸ M (p. 27)		
4.	Does the agency's single integrated financial management system provide the capability to create additional subaccounts to the general ledger for agency specific tracking and control? M (p. 27)		

⁸ A pseudo code can be used instead of the exact SGL account numbers provided that the account descriptions and posting rules are the same as those used in the SGL for relevant transactions (p. 27).

	Obligation	Yes, No,	Explanation
		or N/A	r
5.	If the agency's single integrated financial management system provides the capability to create additional subaccounts to the general ledger for purposes of agency specific tracking and control, do the subaccounts summarize to the SGL? M (p. 27)		
6.	Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the full estimated cost, including both direct and indirect costs, of the interagency agreement? M (p. 27)		
7.	Does the agency's single integrated financial management system provide to both acquisition users and finance users transaction details to support account balances? M (p. 27)		
8.	Does the agency's single integrated financial management system provide the capability to both acquisition users and finance users to access a hard copy or an electronic copy (where cost-effective) of the entire executed (signed) contract? ⁹ M (p. 28)		

⁹ Per FAR 4.201(a), 48 C.F.R. sec. 4.201(a) (2002) the entire signed contract is provided to the paying office (p. 28).

	Obligation	Yes, No, or N/A	Explanation
9.	 Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following data elements in the executed (signed) contract, including those captured at obligation: M (p. 28) a. Obligating document number (if different from contract number)? b. Contractor name? c. Contractor address? d. Contract administration office? e. Payment office? f. Unit of measure? g. Unit price? h. Extended price? i. Quantity? j. Variance amount or percentage allowed? k. Total amount? 		

	Yes,	
Obligation	No,	Explanation
	or	
	N/A	
l. Payment terms and		
conditions (e.g., discount		
terms, applicable payment		
clauses, withhold		
indicator, withhold		
percentage, etc.)?		
m. Delivery schedule or		
performance schedule?		
performance senerate.		
n. Estimated completion		
date?		
o. Payment type (e.g.,		
prompt pay, fast pay,		
progress pay, or partial		
pay)?		
pay).		
p. Names of government-

officials?		
q. Names of government-		
designated invoice-		
approving officials?		
-FF		
r. Names of government-		
designated acceptance		
officials?		
s. Shipping costs?		
t. Shipping terms (e.g.,		
freight-on-board (FOB)		
destination)?		
10. Does the agency's single		
integrated financial		
management system identify		
the method of acquisition		

Obligation	Yes, No, or N/A	Explanation
(e.g., purchase or lease) for the original obligation? M (p. 28)		
 11. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information where applicable: V (p. 29) a. Performance measure code? b. Revenue source code? c. Additional funding indicator, including increases and decreases? d. Line item number? e. Contract line item data? f. Agency location code (ALC)? 		
12. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access an indicator (e.g., Y/N) as to whether payments to the contractor are exempt from electronic funds transfer (EFT)? V (p. 29)		

Obligation	Yes, No,	Explanation
	or N/A	
 13. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access for an EFT payment: V (p. 29) 		
a. Contract number (including modification number, if any)?		
b. All associated delivery order numbers (including modification number, if any)?		
c. All associated task order numbers (including modification number, if any)?		
d. Purchase order (PO) number (including modification number, if any)?		
e. Blanket purchase agreement (BPA) number (including modification number, if any)?		
f. All associated BPA call numbers (including modification number, if any)?		
g. Name?		
h. Remittance address?		

	Obligation	Yes, No, or N/A	Explanation
i.	Signature of the contractor official authorized to provide EFT information?		
j.	Title of the contractor official authorized to provide EFT information?		
k.	Telephone number of the contractor official authorized to provide EFT information?		
l.	Name of the contractor's financial agent?		
m.	Address of the contractor's financial agent?		
n.	Nine-digit routing and transit number (RTN) of the contractor's financial agent?		
0.	Contractor's account number?		
p.	Type of account (checking, savings, or lockbox) for the contractor's account?		
q.	The Fedwire Transfer System telegraphic abbreviation of the		

Obligation	Yes, No, or N/A	Explanation
contractor's financial agent?		
r. Name of the financial institution receiving the wire transfer payment, if the contractor's financial agent is not connected directly to the Fedwire Transfer System online?		
s. Address of the financial institution receiving the wire transfer payment, if the contractor's financial agent is not connected directly to the Fedwire Transfer System online?		
t. Telegraphic abbreviation of the financial institution receiving the wire transfer payment, if the contractor's financial agent is not connected directly to the Fedwire Transfer System online?		
u. Nine-digit RTN of the financial institution receiving the wire transfer payment, if the contractor's financial agent is not connected directly to the Fedwire Transfer System online?		

Obligation	Yes, No, or N/A	Explanation
14. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to cross-reference contract numbers and related interagency agreements? V (p. 29)		
 15. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following lease information: V (pp. 29-30) 		
a. Amount?b. Agency option to purchase at end of lease?		
c. Purchase price if agency has option to purchase?		
d. Life expectancy of leased property when new?		
e. Remaining life expectancy of leased property when leased?		
f. Current retail or fair value of leased property?		
g. Agency option to property ownership transfer at end of lease?		

Obligation	Yes, No,	Explanation
	or N/A	
h. Access to the lease agreement, including terms and conditions (e.g., discount terms and lease period)?		
 16. Does the agency's single integrated financial management system provide the capability to enable: V (p. 30) 		
a. Electronic contracting?		
b. Electronic obligation of funds?		
c. Electronic approvals and signatures?		
d. Electronic notification alerts for pending actions?		
 17. Does the agency's single integrated financial management system provide the capability to record: V (p. 30) 		
a. Appropriate periodic obligations against appropriated funding and contracts?		
b. Appropriate contract- specified cost escalations to existing contract line numbers?		

Obligation	Yes, No, or N/A	Explanation
 18. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information associated with contract changes: V (p. 30) a. Change in product or service descriptions? b. Change in unit of measure? 		
c. Change in quantity?		
d. Change in unit price?		
e. Change in total amount?		
f. Change in extended price?		
g. Change to payment terms and conditions?		
h. Change to delivery/performance schedule?		
i. Revised estimated completion date?		

De-Obligation	Yes, No, or N/A	Explanation
 To support the de-obligation process, does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information previously supplied for the original obligation: M (pp. 26-27, 32) a. Fiscal year? b. Appropriation or Treasury fund symbol? c. Organization code? d. Cost center? e. Object classification? f. Project code? g. Program code? h. Obligation amount? i. PR number? j. Funded through date (for those contracts that are incrementally funded)? k. Contract number (including modification number, if any)? 	N/A	

	De-Obligation	Yes, No, Or N/A	Explanation
1.	All associated delivery order numbers (including modification number, if any)?		
m.	All associated task order numbers (including modification number, if any)?		
n.	Purchase order number (including modification number, if any)?		
0.	Blanket purchase agreement (BPA) number (including modification number, if any)?		
p.	All associated BPA call numbers (including modification number, if any)?		
q.	Contractor name?		
r.	Contractor TIN?		
s.	DUNS identification?

y. Product or service description?		
z. Amounts increased, if any?		
aa. Amounts decreased, if any?		
bb. Subject-to-funds- availability indicator?		
cc. Asset identifier code?		
To support the de-obligation process, does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access information previously supplied for the original obligation, on the full estimated cost, including both direct and indirect costs, of the interagency agreement? M (pp. 27, 32)		
To support the de-obligation process, does the agency's single integrated financial management system provide to both acquisition users and finance users information, previously supplied for the original obligation, on transaction details to support account balances? M (pp. 27, 32)		

De-Obligation	Yes, No, or N/A	Explanation
4. To support the de-obligation process, does the agency's single integrated financial management system provide the capability to both acquisition users and finance users to access a hard copy or an electronic copy (where cost-effective) of the entire executed (signed) contract ¹⁰ previously supplied for the original obligation? M (pp. 28, 32)		
 5. To support the de-obligation process, does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following data elements in the executed (signed) contract previously supplied for the original obligation, including those captured at obligation: M (pp. 28, 32) 		
a. Obligating document number (if different from contract number)?		
b. Contractor name?		
c. Contractor address?		
d. Contract administration office?		

¹⁰ Per FAR 4.201(a), 48 C.F.R. sec. 4.201(a) (2002), the entire signed contract is provided to the paying office (p.28).

De-Obligation	Yes, No, or N/A	Explanation

y. Variance amount or percentage allowed?		
z. Total amount?		

	Payment	Yes, No, or N/A	Explanation
5.	Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access a protest decision that resulted in the award of costs? M (p. 36)		
6.	Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the specified duration of land rights acquired? M (p. 36)		
7.	Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access any restrictions on the use or convertibility of general property, plant and equipment (PP&E) acquired ¹³ ? M (p. 36)		

¹³ For example, when the general property, plant and equipment acquired refers to land donated to agency for its use with the provision that if the agency ceases operations at that location, the land would revert back to the donor (p. 36).

Payment	Yes, No, or N/A	Explanation
8. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the following required information associated with the payment for PP&E acquired under lease: M (p. 36)		
a. Lease agreement?b. Lease terms?		
c. Amount of the lease?		
d. Discount rate?		
9. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the costs associated with the cleanup of PP&E? M (p. 36)		
10. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the asset identifier(s) associated with the cleanup of PP&E? M (p. 36)		

Payment	Yes, No, or N/A	Explanation
 11. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the following items associated with the payment? M (p. 36) a. Asset identifier and/or project/program code? b. Asset category¹⁴? 		
12. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the following information associated with acquisitions related to software development: M (p. 37)		
a. Total acquisition costs by line item description of phase (e.g., completion of conceptual formulation, design, and testing)?		
b. Transaction purpose (e.g., acquisition, data conversion, or repair)?		
c. Asset identifier or associated		

 $^{^{14}}$ For example, the national defense assets, multi-use heritage assets, and investments in non-Federal property (p. 36).

Payment project/program?	Yes, No, or N/A	Explanation
d. Elements of products and services acquired (e.g., training, licenses, and manuals)?		
13. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access assignment of claim information to ensure payment is made in accordance with the assignment? ¹⁵ M (p. 37)		
14. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the contract terms regarding delivery or constructive delivery? M (p. 37)		
15. Does the agency's single integrated financial management system provide the capability, related to the contract, for both acquisition users and finance users to access the advance/prepayment terms associated with a contract		

 $^{^{15}}$ As in the case of a bank ruptcy or court ordered restructuring (p. 37).

Payment	Yes, No, or N/A	Explanation
financing agreement? M (p. 37)		
16. Does the agency's single integrated financial management system provide the capability, related to the payment request, for both acquisition users and finance users to access the bill, invoice, or written request for payment? M (p. 37)		
 17. Does the agency's single integrated financial management system provide the capability, related to the payment request, for both acquisition users and finance users, to access the following proper invoice¹⁶ information: M (pp. 37-38) 		
a. Name of contractor?		
b. Address of contractor?		
c. Contract number (including modification number, if any)?		
d. All associated delivery order numbers (including modification number, if any)?		
e. All associated task order		

 $^{^{16}}$ A bill or written request for payment that meets the minimum standards specified in the applicable prompt payment clause and other terms and conditions contained in the contract for invoice submission. A "proper invoice" must meet the requirements of 5 C.F.R. sec. 1315.9(b) (2002), and can include receiving reports and delivery tickets when contractually designated as invoices (p. 83).

	Payment	Yes, No, or N/A	Explanation
	numbers (including modification number, if any)?

i. Program Code?		
j. Individual name or office name of cardholder?		
 49. Does the agency's single integrated financial management system provide process controls that support the following pre-audit verifications: M (pp. 43-44) a. Contract number is valid? b. Payee name is correct? c. Required administrative authorizations for the procurement were obtained (names, titles, and phone numbers)? 		
d. Required administrative approvals for payment were obtained (names, titles, and phone numbers)?		

Payment	Yes, No, or N/A	Explanation
e. Taxpayer identification number (TIN) or payee identification number provided?		
f. Payment is not a duplicate payment?		
g. Delivered items or services are in accordance with the contract (quantities, prices, and amounts)?		
h. Payment amount is in accordance with the contract, including any adjustments?		
i. Payment tracking control number, (the number that links the invoice to the government payment)?		
j. Description of items and services, quantity, and price on the invoice match the same elements in the contract to ensure that the correct contract/order number has been cited by the vendor, the correct obligation charged, and only contracted items/services and quantities are paid for?		
k. Cost-effective discounts have been taken?		
Payment	Yes, No, or N/A	Explanation
---	--------------------------	-------------
 All applicable deductions were made and credited to the proper account in the correct amount? 		
m. Receipt, acceptance and payment are matched to funding source(s) in accordance with the contract?		
n. Financing payments have been properly liquidated against delivery payments?		
50. Does the agency's single integrated financial management system provide process controls that verify that the appropriate government officials have signed the appropriate form authorizing payment? M (p. 44)		
51. Does the agency's single integrated financial management system provide process controls that verify funds availability before making payment? M (p. 44)		
52. Does the agency's single integrated financial management system provide process controls that verify that electronic payments are within the maximum amount		

Payment	Yes, No, or N/A	Explanation
specified in the <i>Treasury</i> <i>Financial Manual</i> (TFM)? ²² M (p. 44)		
53. Does the agency's single integrated financial management system provide the capability to capture vendor information required when registering with the Central Contractor Registration (CCR)? M ²³ (p. 44)		
54. Does the agency's single integrated financial management system provide the capability to track activity by CCR identifier? $\mathbf{M}^{^{23}}$ (p. 44)		
55. Does the agency's single integrated financial management system provide the capability to provide an indicator (e.g., Y/N) as to whether the contractor is registered through the CCR? \mathbf{M}^{23} (p. 44)		
56. Does the agency's single integrated financial management system provide the capability to provide an		

²² See the *Treasury Financial Manual*, I TFM 4-2000, *Payment Issue Disbursing Procedures* (p. 67).

²³ JFMIP designated this requirement as "value-added" but pointed out that it would become mandatory upon issuance of governmentwide implementing standard requirements (p. 44). OMB has since issued its *Memorandum for the Heads of Departments and Agencies*, M-03-01, October 4, 2002, *Business Rules For Intragovernmental Transactions* which became effective October 1, 2003.

Payment	Yes, No, or N/A	Explanation
indicator (e.g., Y/N) as to whether the contractor is exempt from registering through the CCR? M ²³ (p. 44)		
57. Does the agency's single integrated financial management system provide the ability to produce aged accounts payable information? V (p. 44)		
58. Does the agency's single integrated financial management system provide the ability to cross-reference contract numbers and related interagency agreements? V (p. 44)		
 59. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following optional data elements of the contract: V (p. 44) a. Line item number? b. Estimated completion 		
60. Does the agency's single integrated financial management system provide the capability to access the contract payment method		

Payment	Yes, No, or N/A	Explanation
(e.g., payment to be made by purchase card or other noninvoice means, or payment to be made by invoice) which triggers a rejection of any invoice, if the payment method specified by the invoice differs from that allowed for in the contract? V (p. 44)		
61. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the name(s) of individual(s) who must approve the invoice before payment can be made? V (p. 45)		
62. Does the agency's single integrated financial management system provide the capability to allow contracting staff to determine whether a contractor is a first-time contractor or abuser of fast pay (so that contracting can determine whether or not to include a fast-pay clause)? V (p. 45)		
63. Does the agency's single integrated financial management system provide the capability to enable: V (p. 45)		

Payment	Yes, No, or N/A	Explanation
a. Electronic receiving report processing?		
b. Electronic submission of invoices?		
c. Electronic approval and signatures?		
d. Electronic notification alerts for pending actions?		
 64. Does the agency's single integrated financial management system provide the capability to compare the following electronic invoice data elements to the contract data and advise of "match" or "no match:" V (p. 45) a. Contract/order number? b. Description of items or services? c. Quantity? d. Price? 		
65. Does the agency's single integrated financial management system provide the capability to "forward" or make available the invoice data to others outside the finance office ²⁴ for receipt and acceptance sign-offs on- line? V (p. 45)		

²⁴ Others outside the finance office refer to receiving and accepting personnel and contracting office personnel (p. 45).

Payment	Yes, No, or N/A	Explanation
66. Does the agency's single integrated financial management system provide the capability to: V (p. 45)		
a. Record or recognize if invoiced quantities exceed, match or are less than contract quantities?		
b. Keep track of quantities yet to be invoiced or received?		

		Closeout	Yes, No, or N/A	Explanation
1.	int ma the bo fin	bes the agency's single begrated financial anagement system provide e capability to provide, for th acquisition users and ance users, a receiving port containing: M (p. 48)		
	a.	A final indicator?		
	b.	Acceptance acknowledged by a designated agency official?		
	c.	Contract number (including modification number, if any)?		
	d.	All associated delivery order numbers (including modification number, if any)?		
	e.	All associated task order numbers (including modification number, if any)?		
	f.	PO number(including modification number, if any)?		
	g.	BPA number (including modification number, if any)?		
	h.	All associated BPA call numbers (including modification number, if any)?		

Closeout	Yes, No, or N/A	Explanation
i. Date of receipt?		
j. Date of acceptance?		
k. Final acceptance indicator?		
2. Does the agency's single integrated financial management system provide the capability to access or provide evidence that the contractor's final invoice has been submitted? M (p. 49)		
 3. Does the agency's single integrated financial management system provide the capability to provide evidence that final invoice payment has taken place with the following: M (p. 49) a. Final payment indicator, including any resolution of contract withholds? b. Invoice number? 		
c. Total amount paid?		

	Closeout	Yes, No, or N/A	Explanation
4.	Does the agency's single integrated financial management system provide the capability, where excess funds have been identified, to provide: M (p. 49)		
	a. The document number under which the funds were obligated?		
	b. The amount of the de- obligation?		
	c. The date of the de- obligation?		
5.	Does the agency's single integrated financial management system provide the capability to provide an accounting document number? V (p. 49)		
6.	Does the agency's single integrated financial management system provide the capability to enable: V (p. 49)		
	a. Electronic contracting?		
	b. Electronic obligation of funds?		
	c. Electronic approvals and signatures?		
	d. Electronic notification alerts for pending actions?		

Micropurchases Made with Purchase Cards	Yes, No, or N/A	Explanation
 Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information at the time of purchase card approval: M (pp. 56-57) 		
a. Card number?		
b. Fiscal year?		
c. Appropriation/Treasury fund symbol?		
d. Organization code?		
e. Cost center?		
f. Object class?		
g. Project code?		
h. Program code?		
i. Individual name or office name of cardholder?		

Micropurchases Made with Purchase Cards	Yes, No, or N/A	Explanation
 2. Does the agency's single integrated financial management system provide the capability for both acquisition users and finance users to access the following information at the time of invoice/payment, recorded by card-issuing institution: M (p. 57) a. Amount? b. Card number? c. Individual name or office of cardholder? 		

General Systems Requirements	Yes, No, or N/A	Explanation
 Do all components of the agency's single integrated financial management system provide, at a minimum, the following qualities: M (p. 59) 		
a. Complete and accurate funds control?		
b. Complete, accurate, and prompt recording of obligations?		
c. Complete, accurate, and prompt payment of payment requests?		
d. Complete, accurate, and prompt generation of acquisition/financial records and transactions?		
e. Complete and accurate maintenance of acquisition/financial records and transactions?		
f. Timely and efficient access to complete and accurate information, without extraneous material, to those internal and external to the agency who require the information?		
g. Timely and proper sharing of common information between the acquisition		

 $^{^{25}}$ As prescribed by law (p. 59).

General Systems Requirements	Yes, No, or N/A	Explanation
and core financial systems, and other mixed systems (e.g., property management systems)?		
h. Adequate management controls, including internal and security controls, policies, and procedures intended to protect the agency's key systems, data, and interfaces from disruption and unauthorized access or alteration ²⁵ ? M (p. 59)		
 2. Does the agency's single integrated financial management system facilitate the reconciliation of information that is common to the acquisition system and the core financial management system by providing for: M (p. 60) a. Multiple levels of system 		
a. Multiple levels of system access, transaction authorization, and approval authority?		
b. Single source data entry?		
c. Validation of funds availability prior to scheduling payment?		
d. Communication of the need for additional funds?		

General Systems Requirements	Yes, No, or N/A	Explanation
e. Simultaneous posting of budgetary and proprietary accounts?		
f. Prepayment examinations from diverse locations?		
g. Controls to ensure transaction processing in proper chronological and numeric sequence?		
h. Standard edits for shared data?		
 3. Does the agency's single integrated financial management system provide audit trails to trace transactions from: M (p. 60) 		
a. Source documents?		
b. Original input?c. Other systems?		
d. System-generated transactions?		
 4. Does the agency's single integrated financial management system provide transaction details to support account balances? M (p. 60) 		
5. Does the agency's single integrated financial management system provide		

	General Systems Requirements	Yes, No, or N/A	Explanation
	the capability to relate data elements to each other through an integrated data query facility that supports ad hoc query access to financial information? M (p. 60)		
6.	Does the agency's single integrated financial management system provide data analysis reporting tools? M (p. 60)		
7.	Does the agency consult JFMIP's Framework for Federal Financial Management Systems and Core Financial System Requirements documents in determining appropriate technical requirements for the agency's operating environment? M (p. 60)		
8.	Does the agency identify and test agency functional requirements? M (p. 60)		
9.	Does the agency perform acceptance and independent verification and validation to ensure that the acquisition system meets performance requirements and integrates within the agency's specific information technology environment? M (pp. 60-61)		

General Systems Requirements	Yes, No, Or N/A	Explanation
10. Does the agency's single integrated financial management system provide flexible security facilities to control user access at varying degrees including: M (p. 61)		
a. Overall system access?		
b. Capability to perform specific functions (e.g, inquiry, update)?		
c. Access to certain functionality?		
11. Does the agency's single integrated financial management system provide the capability to define access to specific functions by: M (p. 61)		
a. User name?		
b. Class of user?		
c. User's position?		
12. Does the agency's single integrated financial management system provide for multiple levels of approvals based on user- defined criteria including: M (p. 61)		
a. Dollar limits?		

General Systems Requirements	Yes, No, or N/A	Explanation
b. Type of document processed?		
13. Does the agency's single integrated financial management system provide the capability to perform reconciliation routines for internal participant: M (p. 61)		
a. Accounts?b. Ledgers?		
c. Funds?		
14. Does the agency's single integrated financial management system provide the capability to identify unsuccessful reconciliations via either error log or error report? M (p. 61)		
15. To ensure the security and confidentiality of records and to protect against anticipated threats or hazards to record security or integrity which could result in substantial harm, embarrassment, inconvenience, or unfairness to any individual on whom information is maintained, has the agency's single integrated financial management system established the appropriate:		
M (p. 61)		

General Systems Requirements	Yes, No, or N/A	Explanation
a. Administrative safeguards?		
b. Technical safeguards?		
c. Physical safeguards?		
 16. Does the agency's single integrated financial management system provide a mechanism to: M (p. 61) a. Monitor changes to software coding? b. Identify any individual who makes changes to the software coding? c. Determine whether the individual who made changes to the software coding is an authorized user? 		
17. Does the agency's single integrated financial management system have the ability to report on contract funding and payment by: M (p. 61)		
a. Contract number?b. All associated delivery order numbers?		
c. All associated task order numbers?		

General Systems Requirements	Yes, No, or N/A	Explanation
d. Purchase order number?		
e. Blanket purchase agreement number?		
f. All associated BPA call numbers?		

	Records Retention	Yes, No or N/A	Explanation
1.	Is the agency's single integrated financial management system sufficiently flexible to retain information consistent with varying record keeping requirements? M (p. 63)		
2.	Is the agency's single integrated financial management system sufficiently flexible to purge information consistent with varying record keeping requirements? M (p. 63)		

Related GAO Products

These related products address three main categories: internal control, financial management systems, and financial reporting (accounting standards). We have developed these guidelines and tools to assist agencies in improving or maintaining effective operations and financial management.

GAO's Mission	The General Accounting Office, the audit, evaluation and investigative a Congress, exists to support Congress in meeting its constitutional respo- and to help improve the performance and accountability of the federal government for the American people. GAO examines the use of public fe evaluates federal programs and policies; and provides analyses, recommendations, and other assistance to help Congress make informed oversight, policy, and funding decisions. GAO's commitment to good go is reflected in its core values of accountability, integrity, and reliability.	onsibilities funds; ed overnment		
Obtaining Copies of GAO Reports and Testimony	The fastest and easiest way to obtain copies of GAO documents at no cost is through the Internet. GAO's Web site (www.gao.gov) contains abstracts and full- text files of current reports and testimony and an expanding archive of older products. The Web site features a search engine to help you locate documents using key words and phrases. You can print these documents in their entirety, including charts and other graphics.			
	Each day, GAO issues a list of newly released reports, testimony, and correspondence. GAO posts this list, known as "Today's Reports," on its daily. The list contains links to the full-text document files. To have GA this list to you every afternoon, go to www.gao.gov and select "Subscrib alerts" under the "Order GAO Products" heading.	.O e-mail		
Order by Mail or Phone	The first copy of each printed report is free. Additional copies are \$2 each. A check or money order should be made out to the Superintendent of Document GAO also accepts VISA and Mastercard. Orders for 100 or more copies mailed single address are discounted 25 percent. Orders should be sent to:
